Seleem: What is it, Dad?
Dad : Our tomato plants are growing on the balcony! Look, can you see the leaves and the flowers?
Seleem: Oh yes, but why are the tomatoes green?
Dad : Tomatoes are green before they are red.
Seleem: How do we grow new tomatoes?
Dad : Tomatoes have seeds inside. We can take the seeds and grow new tomatoes! We plant a seed and the plant grows. That is called germination. We water the plant every day, and the roots grow under the soil. The plant grows flowers and the flowers become tomato fruits.
Seleem: That's awesome! And I found a red tomato! Let's have it for lunch!

Sample test on unit 3 1- Listen and write T (True) or F (False): (4 Marks) ص ١٩

Flowers, especially roses, have always been considered one of the symbols of love, but you should know that flowers as they have benefits, they also have some damages. That is, all flowers are not good and beneficial to humans, some of them contain a number of toxic chemicals, as everything has two faces, as well as flowers, we may find that the thorns of some of them may injure our hands, and there are types of flowers known as forest flowers and are dangerous to humans. That painful truth will not negate the idea that flowers were and still are the most beautiful creations of nature, and that growing trees must be planted around all homes, offices or any empty place so that a lot of pleasure is obtained from that gift that we take from nature. Flowers have the ability to change a person's mood.
